**PRESS RELEASE**

### **Third cohort completed in Aptahem's FIH study**

**Aptahem AB (publ), a biotech company developing treatments for patients suffering from acute inflammatory diseases such as sepsis, announces today that the third cohort of healthy volunteers (HV) has been dosed and completed in the clinical First in Human (FIH) study.**

After the follow-up visits of this third cohort, Aptahem-1 continues to be safe and well tolerated. The study will continue according to plan with dosing HV in the fourth cohort later this month.

#### **About Aptahem**

Aptahem AB (APTA) is a clinical stage biotechnology company that develops aptamer-based pharmaceuticals for the treatment of acute, life-threatening conditions in which a combination of coagulation, inflammation and tissue damage are involved. The company's lead candidate, Aptahem-1, is currently in early clinical phase. Aptahem-1 has in preclinical studies, by its anti-thrombotic, immunomodulating and tissue repairing characteristics, shown very positive and promising results as treatment for sepsis and critical conditions associated with sepsis.
